NEW GRANT

Dr. Russell Witte has been awarded $3,434,477 from the National Institute of Biomedical Imaging and Bioengineering to develop the first safe, real-time and high-resolution system for mapping electricity in the human brain. The Transcranial Acoustoelectric Brain Imaging (tABI) that will be developed by Dr. Witte’s team aims at transforming our understanding of normal brain function and help diagnose, monitor, and treat a wide variety of neurologic, psychiatric, and behavioral disorders.

Happy Holidays

The past year will be memorable for many reasons, but amongst unprecedented challenges, the warm welcome that I received when joining our department stands out for me. As we turn the page on 2020, I wish you and your families a joyous holiday season, good health, and happiness in the upcoming year.
