IN MEMORIAM

It is with great sadness that we announce the unexpected passing of [Jean-Philippe \(JP\) Galons, PhD](#), on July 13, 2024, in Tucson, Arizona.

Dr. Galons' journey with the University of Arizona began as a postdoctoral fellow in the Department of Biochemistry. After leaving briefly to serve as assistant professor at the University Aix Marseille in France, Dr. Galons returned to the University of Arizona as a Research Associate Professor of Radiology, a role he dedicated himself to for the past 30 years.

Dr. Galons was a renowned expert in MRI technology and its applications in preclinical and translational research. As a key member of the Translational Bioimaging Resource, he played a crucial role in supporting the 7T Bruker small animal MRI scanner. His contributions extended to our clinical MRI program, where he aided in advanced applications for clinical practice and research.

Dr. Galons is survived by his wife, Maria Altbach, and their two children. He will be remembered by his many colleagues and friends as a kind soul who brought joy and positivity into their lives. With a way of making everyone around him feel valued and appreciated, Dr. Galons – or JP as he is best known, is described as a brilliant scientist, a solution finder and an inspiring people-person. His dedication to family, research and his unwavering support of others leaves a lasting impact. An event honoring and celebrating JP's life will be held in September.

OUTREACH

Organizers **Sarah Placek** (IR – Integrated R2), **Conner Reynolds** (DR R3), and **Ina Rios** (MI) working with **Alma Aguirre**, (Med-Start) hosted a group of fifty 11th grade high school students interested in health professions.

The other volunteers who made this event possible are

- ▶ **Miles Seidel** (DR R3)
- ▶ **Cheyenne Moffett** (DR R2)
- ▶ **James Dolan** (DR R2)
- ▶ **J'rick Lu** (DR R4)
- ▶ **Stefano Natali** (DR R4)
- ▶ **Elka Rubin** (MS4)

All students rotated through four hands-on activities: Endovascular Wires and Catheters, Ultrasound Guided Abscess, Kahoot learning and a live Ultrasound demonstration

FANTASTIC FEEDBACK

Martin Dufwenberg, 2nd-Year DR Resident, recently received a tremendous compliment. An Attending Physician in the Emergency Department who worked with Dr. Dufwenberg during his overnight call shift had a nice report.

The attending said, “...I really like that guy! I especially appreciate that he would always call us to discuss patients he wasn’t sure about or when he needed more information to make a call, rather than just sending a wishy-washy report. His reports are great overall.”

Thank you to 3rd-Year DR Resident Conner Reynolds for relating this good news!
